## **EPoS DISTRIBUTOR LAUNCH PARTNER TECH'S NEW EM-200 LIGHTWEIGHT TABLET PC**

EPoS Distributor, the York based Specialist Retail IT distributor is pleased to announce the launch of Partner Tech's new EM-200 tablet PC. Designed with flexibility and mobility in mind, the EM-200 is a wireless mobile computer that is powerful, yet compact and slim, and able to meet a wide variety of operational and business needs.

Michelle Spencer, EPoS Distributor BDM commented "We are delighted to add the EM-200 to our product range. This tablet PC is not only lightweight but dust and spill resistant and its reinforced casing protects against day-to-day bumps and scuffs, making it an ideal solution for a range of application areas such as restaurants, sales floor and inventory control. The EM-200 can be connected directly to a printer, cash drawer or any other peripheral device, making it versatile enough to bypass the need to install a full EPoS system."

Tim Van den Branden, Managing Director of Partner Tech added "The EM-200 brings full-scale office IT out onto the restaurant floor, retail showroom, or into the homes and offices of customers, enabling users to carry out their work on the go without being forced to return to a fixed station or office."

The EM-200 features a 10.1" resistive touch panel with LED backlight, WiFi and Bluetooth. Powered by Microsoft Windows XP and 1.6GHz Intel Atom processor, it is able to cope with almost any job, whilst maintaining its battery life. There is also an optional 1.3 megapixel camera available.

## PRESS RELEASE

The EM-200 is now available to order from EPoS Distributor. For pricing and stock availability, please visit our website [www.eposdistributor.co.uk](http://www.eposdistributor.co.uk).
